

Shoulder Stability Brace with Pressure Pad

Item No: C003
 Material: Neoprene+OK cloth
 Size: One size fits all(left or right)
 Color: Gray,Black,Pink,Blue,Skin
 Packing: 1 piece / opp bag,100 pcs/carton

Wearing a shoulder guard can add pressure to the shoulder and effectively prevent sprains. The shoulder adopts secondary pressure to better fix and protect the shoulder. When wearing it, the tightness of the Velcro can be adjusted according to personal needs for pressure protection. Fixed adjustment straps are designed at the arms and underarms, and the user can stretch and adjust to the degree of personal habit.

Common Examples of Use

- Sports people fight against injuries
- People with old injuries reduce the recurrence of old injuries
- Aging shoulder joints in the elderly
- Office workers work hard for a long time

Product Features

- Two-way compression design
- Strap adjustment and fixation
- Breathable perforated fabric
